

SUMMARY

Self-taught and passionate backend developer with extensive experience in building scalable, secure, and high-performance server-side applications. Proficient in Django, Flask, Express, Node.js, REST APIs, and Docker. Skilled in designing and implementing RESTful APIs, microservices, and full-stack solutions. Committed to continuous learning and delivering clean, maintainable code that meets client needs.

EDUCATION

Munshirhat Degree College

Higher Secondary School Certificate
2021 - 2023

Self-Taught Developer

Continuously learning and staying up-to-date with the latest tools, frameworks, and best practices in the industry.

SKILLS

- Backend Development:** Django, Flask, Express, Node.js, Hono.js, FastAPI
- Frontend Integration:** Next.js, React, svelte
- API Development:** REST APIs, Microservices, GraphQL
- Containerization:** Docker
- Database Management:** SQL, SQLite, PostgreSQL, MongoDB
- Version Control:** Git, GitHub
- Deployment:** Docker, Kubernetes
- Other Tools:** Nginx, Celery, Redis

CERTIFICATIONS

- HSC 2023 [MDC]
- Backend Dev & API [freeCodecamp]

ADDITIONAL INFO

- Languages:** English (Fluent), Bangla, Hindi
- Interests:** Open-source contribution, Web development, Continuous learning, DevOps

PROFESSIONAL EXPERIENCE

Backend Developer

Freelance | 2022- Present

- Developed and maintained scalable backend systems for various clients using Django, Flask, and Express.
- Designed and implemented RESTful APIs and microservices to support client applications, ensuring high performance and security.
- Integrated frontend frameworks like Next.js with backend systems to create seamless full-stack applications.
- Utilized Docker to containerize applications, streamlining deployment and ensuring consistency across environments.
- Collaborated with cross-functional teams to define, design, and ship new features, while improving existing solutions.
- Made Dapps on blockchain

PROJECTS

LinkLens

A URL shortening service built with Django, integrating is.gd API for shortening links and providing click analysis. The project includes features for user authentication, email verification, and password management.

XORpass

XORpass is a Flask-based password manager application with MongoDB integration. It allows users to securely store their passwords in a MongoDB database.

E-Commerce Platform

A multi-vendor e-commerce platform using Bootstrap for design, with features like product display, user management, and seller profiles.
